

XVIEW PROFESSIONAL

Mid Range Client Viewing

One of the most versatile client viewing stations of the market today, the xVault Professional is a client viewing station designed with multiple features and form factors. With the ability to fit in almost any installation environment, the xVault Professional comes in a small form factor for wall mounting, tower configuration for desktop placement, and rackmount to fit within a server rack. Engineered to support mid-range surveillance projects this dynamic client viewing station can handle up to six monitors. Equipped with the 4th generation Intel® Core™ i5 processor and 4th generation Intel® Core™ i7 processor, this appliance is able to handle a wide range of video content.

All of xVault client viewing stations are built for the surveillance market. Understanding the high demands of a viewing solution, the xVault Professional has been thoroughly tested with leading video management software (VMS) platforms. Optimized for each VMS and the surveillance market, integrators can rest assured the xVault Professional will have exceptional performance for multiple monitor viewing.
